FOUNDRY

All the raw material used in our production complies with relevant regulations for each alloy.

QUALITY

With rigorous quality control, Fundiciones Río Ebro manages to maintain its production at a high level of satisfaction, taking corrective actions to the first sign of non-conformity.

MACHINING

As a commitment to meet all the needs of our customers, Fundiciones Rio Ebro has its own machining section exclusively for castings parts in its facilities.

SURFACE FINISHING

With a highly controlled surface finish section, Fundiciones Rio Ebro guarantees the quality of the manufactured parts.

MOLD MAKING

Based on drawings designed in 2D and 3D provided by the customer, we define the format of the molds required for the design of the part, depending on an external company for its manufacture and we take responsibility for the care and conservation.

PAINTED PARTS

Fundiciones Rio Ebro offers its customers parts painting services through highly qualified external suppliers, with in house quality control before the parts are delivered to the final customer.
